

JOB DESCRIPTION

MECHANICAL ENGINEER

Evolve Solutions, LLC is a high-end custom fabrication company based in Painesville, OH. We make awesome happen every day. Our clients are some of the biggest motorsport teams, marketing agencies and brands in the world, for which we assist in designing and fabricating race transporters and experiential displays. We have a sharp focus on client satisfaction and a desire for continued innovation.

Can you easily bring a project from an idea to conception? Do you possess the ability to explain and simplify complex issues? Do you want to be part of a highly collaborative team with a diverse skill set? If so, then we want to hear from you! Come join our organization of committed employees with combined centuries of experience fabricating race transporters.

We are seeking to add an integral piece of the puzzle to our award-winning team by welcoming a new Mechanical Design Engineer. This is a newly created position in which the selected candidate will design, develop, and help deliver new and improved race transporters, trailers, motorcoaches and other products while providing exceptional client services and maintaining the credibility of the Evolve brand.

WHAT YOU CAN EXPECT IN THIS ROLE:

The ideal candidate will have an in-depth understanding of physics and mathematics with the ability to analyze data, identify trends and develop recommendations for improvements by researching and solving complex, multi-faceted challenges. This individual must be able to organize and execute large volumes of work to ensure deadlines are met in a rapidly changing environment. Qualified candidates will have experience with knowledge of the motorsports, race transporter, and experiential marketing industry with a background in manufacturing.

KEY RESPONSIBILITIES:

- Identify and specify metals, composites, and other materials to use in the development of products to ensure compliance in engineering design and production performance.
- Communicate and work effectively with creative design team and production staff to ensure all production specifications are clear and achievable.
- Evaluate and monitor projects to ensure deliverables on met by established deadline.

TOP SKILLS:

- Excellent verbal and written communication skills
- Excellent interpersonal and conflict resolution skills
- Excellent organizational skills including attention to detail
- Strong analytical and problem-solving skills
- Ability to handle multiple projects at one time
- Ability to prioritize tasks and delegate when appropriate
- Ability to work under stress and maintain tight deadlines
- Comfortable working in a fast-paced environment
- Prior experience with Solidworks and CAD

In exchange for your expertise and talent, we offer a competitive salary with a full benefits package. Relocation assistance may be provided to the right candidate.

Equal Opportunity Employer
